PROFESSIONAL SUMMARY

Software engineer with 6+ years building high-performance SaaS, WordPress and mobile products. Currently lead developer of MultiStepForms at AI Publish, owning architecture, build, testing and releases. Previously led frontend at Brainstorm Force on products serving 7M+ users (Astra, OttoKit, SureCart). Shipped three App Store apps (SwiftUI and Flutter) and multi-tenant Supabase platforms with row-level security. Comfortable across React/Next.js, PHP, Postgres, Solidity and AI integrations (OpenAI, Claude).

TECHNICAL SKILLS

Frontend: React 19, Next.js 16 (App Router, RSC, Server Actions), TypeScript, Tailwind CSS v4, shadcn/ui, Framer Motion, ReactFlow, Redux Toolkit, TanStack Query, Zustand

Backend & Data: Supabase (Postgres, RLS, RPC, Realtime, Edge Functions), Node.js, PHP 8, MySQL, PostgreSQL, MongoDB, REST APIs, webhooks, zod

Mobile: Flutter/Dart (Riverpod, Drift, go_router, Freezed), SwiftUI, SwiftData, watchOS, HealthKit, CloudKit, Firebase Messaging

WordPress: Plugin and theme development, Gutenberg blocks, React admin SPAs, WP REST API, caching (WP Rocket, LiteSpeed, Cloudflare)

Integrations & AI: Stripe, PayPal, Lemon Squeezy, Google Apps Script, OAuth 2.0, OpenAI, Claude, Mistral, RAG

Web3: Solidity, Hardhat, OpenZeppelin, Wagmi/Viem, RainbowKit

Tooling: Git/GitHub, Vercel, pnpm, Playwright, ESLint, Agile/Scrum

PROFESSIONAL EXPERIENCE

Senior Software Engineer

Jan 2026 – Present

AI Publish • Remote • Full-time

- Lead developer of MultiStepForms, a WordPress form and conversational-flow plugin; own the full cycle from architecture and build to testing, releases and tester support.
- Designed and shipped Multi-Step Form mode alongside the conversational builder: step validation, branching, review step, save and resume, popup mode, and Stripe/PayPal payment steps. Delivered with 483 passing tests and 12 ready-made templates.
- Built Google Sheets integration without Google's CASA security review using Apps Script Web App and Service Account modes; added a self-hosted "Connect with Google" OAuth option.
- Cut front-end weight for GTmetrix and Lighthouse: form script from ~117 KB to ~26 KB gzipped and CSS from 47 KB to 19 KB via lazy loading, code splitting and non-blocking styles.
- Fixed data-integrity bugs (multi-input steps saving one answer, long forms losing answers to rate limits, webhooks re-firing on step back) and added cache-aware publishing for WP Rocket, LiteSpeed and Cloudflare.
- Shipped v2.1 to v2.4: reCAPTCHA v3 and honeypot spam protection, 7 new input blocks, retention controls, redesigned settings UI and AI blocks (OpenAI, Claude, Mistral).

Products: [MultiStepForms](#) • [Formgic](#)

Software Developer — Front-end Lead

Feb 2023 – Jan 2026

Brainstorm Force LLC • Remote • Full-time

- Led React to Next.js 14 migration for OttoKit, reducing load time by 60% and lifting customer retention from 65% to 91%.
- Architected an interactive canvas workflow builder on ReactFlow v12, enabling no-code automation for 10,000+ active users.
- Built responsive onboarding and auth flows that grew Week-1 active users from 1,200 to 1,560 (30%).
- Core contributor to Astra Theme (7M+ installations); fixed critical rendering bugs affecting 500K+ users.
- Developed 15+ custom Gutenberg blocks and plugins, improving editor UX by 25% based on user feedback.

Products: [OttoKit](#) • [SureCart](#) • [Astra Theme](#) • [Sigmize](#)

Senior Web Developer

Mar 2021 – Feb 2023

VYK HealthCare Pvt. Ltd. • Remote

- Built a patient portal from scratch, acquiring 3,000 new users in the first six months (30% customer growth).
- Implemented OAuth 2.0 and AES-256 encryption, reducing security vulnerabilities by 50%.
- Optimized WordPress sites from 5.2s to under 2s load time, improving SEO ranking by 35%; automated 80% of appointment confirmations with Zapier and Make.com webhooks.

WordPress Developer

Mar 2020 – Feb 2021

Atomic House • Remote

- Converted 30+ Figma designs into pixel-perfect responsive WordPress themes for 20+ clients.
- Built a reusable ACF component library used across 12 client projects, reducing dev time by 40%; WooCommerce customizations lifted conversion rates by 18%.

FEATURED PROJECTS

Gym Tross — Flutter gym-management app • [App Store](#)

One Flutter binary for gym staff (member registration, QR check-in, payments, renewals, visitor log, branch switching) and members (own membership status). Runs directly on the shared Supabase project with RLS as the tenant boundary, integer-paisa money, append-only financial history and Postgres RPCs.

Tech: Flutter, Riverpod, Freezed, go_router, Supabase, Firebase Messaging

Lord of Gyms — Multi-branch gym management SaaS • [app.lordofgyms.com](#)

Staff console for cash-heavy gym chains in Nepal and South Asia: members, memberships, payments, attendance, classes, invoices, visitor log, HQ dashboard and CSV reports. Server Actions validated by zod, RLS keyed on JWT claims, audit log on every mutation, SMS/Viber reminders sent from Postgres via pg_net and pg_cron.

Tech: Next.js 16, React 19, Supabase Postgres, shadcn/ui, TanStack Table, recharts

GymTrack Pro — Native iOS workout tracker • [App Store](#)

SwiftUI and SwiftData app with companion Apple Watch app, home screen widgets, Live Activities, HealthKit, CloudKit sync, Siri and App Intents. Structured splits, set/rep/RPE logging, 1RM estimation, Swift Charts progress, streaks and CSV export.

Tech: SwiftUI, SwiftData, watchOS, WidgetKit, HealthKit, CloudKit

ExtraHelper — Multi-tenant restaurant management SaaS • [Web](#) • [App Store](#)

POS, KOT, kitchen display, inventory and reservations in one system. Next.js web app plus Flutter staff app on the same Supabase project; RLS keyed on the JWT tenant, Realtime for KDS and table states, Edge Functions for payments and print jobs, offline-first cashier flows with idempotency keys and a Drift outbox.

Tech: Next.js 16, Supabase, Flutter, Riverpod, Drift, Bluetooth printing

Redeemic — AppSumo codes to Lemon Squeezy licenses • [GitHub](#)

WordPress plugin that validates a redemption code, mints a single-use 100% discount locked to one variant and returns a \$0 checkout; a webhook writes the issued key back. Stores only code hashes, claims rows inside the UPDATE's WHERE to prevent double redemption, React admin SPA with batch generation, CSV export and a daily recovery sweep.

Tech: PHP 8, WordPress, React, Lemon Squeezy API

StakeDApp — ERC-20 staking • [Live](#)

Synthetix-style per-second reward distribution across three Solidity contracts with ReentrancyGuard, deployed on Sepolia.

Tech: Solidity, Hardhat, Wagmi v2, Next.js 14

PDF Q&A AI SaaS — Document analysis • [Live](#)

Upload a PDF and ask questions; Claude-powered RAG with source citations in under five seconds.

Tech: Next.js, Claude API, RAG, TypeScript

PropChain — NFT property marketplace • [Live](#)

ERC-721 minting, escrow-backed offers and PROP token yield across four contracts; 48 passing tests, deployed on Sepolia.

Tech: Solidity, OpenZeppelin, Wagmi v2, Next.js 14

ReatorAI — AI content research • [Live](#)

Cuts viral-video research from 60 to 10 minutes with outlier detection, channel watchlists and AI script generation.

Tech: Next.js, OpenAI, Supabase, TypeScript

Also: OttoKit, SureCart, Astra Theme and Sigmize at Brainstorm Force; AI Chatbot Platform, ChefMate, LinguaChat, Study Buddy and NGLFS (open source) as independent builds. Full list at [divyashwar.vercel.app](#).
